UNIVERSITY OF WARWICK ARTS CENTRE PHASE 2

PROJECT NAME: University of Warwick Arts Centre Phase 2	Dodd Group was appointed by Willmott Dixon to install the MEP services to Phase 2 of the University of Warwick Arts Centre Development. This new extension to the building followed on from the initial refurbishment (Phase 1) which we had previously carried out.	
CLIENT: University of Warwick	Working closely with Willmott Dixon, our design consultant, Hoare Lea, and the end user we developed a solution in line with the University of Warwick's specifications and guidelines which also met with the Building Manger and End Users' expectations.	
M&E ORDER VALUE: £4.2 million	The building extension comprised a general reception area and general public areas giving access to the Mead Gallery and multi-purpose auditoria. Within the Mead Gallery humidity controlled ventilation systems were installed to	
CONTRACTOR: Willmott Dixon	 maintain conditions for the displays and exhibitions within the gallery. The heating systems were a mixture of underfloor and trench heating with air conditioning provided to projector, IT and AV rooms. 	
CONSULTANT: Hoare Lea	Electrical supply to the building emanated from the original refurbished building via a new panel and distribution boards. Small power, lighting, fire and intruder alarms, CCTV, EVC, PA, Data and Lightning Protection were also installed.
