
PROJECT NAME:

Integrated Pathology Unit, Wolverhampton

M&E ORDER VALUE:

£3.4 million

The New Cross Hospital provided an opportunity for Dodd Group to demonstrate its expertise at installing specialist M&E services within a hospital environment.

The pathology department handles various patient requirements such as blood tests, urine tests and identifying viral and bacterial infections among patients.

The centre will house various pathology functions and facilities including the microbiology, haematology, clinical chemistry and histopathology units

The 4,160sqm facility includes a number of new laboratories and facilities requiring medical gases and specialist ventilation.
