

Working with Galliford Try, Dodd Group's Southampton team has secured another major project in the region.

"Chesil Street" is the design and build of a new Extra Care Scheme located in Winchester on the former Chesil Street surface car Park.

The MEP services will be designed and delivered by the Dodd Group Southampton team which is fast becoming the leading M&E contractor on the South coast.

The building will comprise 52 individual apartments with associated communal Extra Care facilities, such as lounge, dining area and laundry including space for meeting and socialising with others living at the complex.

Matt Clarke, Dodd Group's regional manager is delighted to have been awarded this prestigious project stating *"We are excited to be part of this fantastic scheme. Our enthusiastic and capable team will drive this project forward under the direction of our client. Chesil Street marks another great win for the region and demonstrates our ability to continue to work in partnership with our client base. Our legacy and ability to deliver at all stages of the contracting process is serving us well and we will make Chesil Street another project executed with precise consideration and professionalism"*

Geoff Pepper, Senior Project Manager for Galliford Try added *"Galliford Try is extremely dedicated to deliver this project to the high specification parameters that the stakeholders have set from day one. In entering into contract with Dodd Group at this early stage in the design phase, it is envisaged that the full capabilities of such a strong M&E contractor will further strengthen the deliverables and ultimately completion of a successful project to all."*
