

Our South West Projects Team has secured the latest project at Falmouth University's Penryn Campus: the Launchpad and link buildings.

The project comprise the design and construction of a research and development educational facility for Falmouth University. The development is comprised of two buildings; the Link and the Launchpad. The units are an extension of the existing AIR Building and the units are connected.

Working with main contractor EBC, construction will commence this month with completion due in August 2018. BDP is architect, landscape architect, civil and structural engineer, acoustic engineer and principal designer. We are working with Method Consulting who provided mechanical and electrical engineering and BREEAM consultancy.
