
PROJECT NAME:

Domestic Electrical Contract

CLIENT:

Warwickshire District Council

CONTRACT LENGTH:

2016 - 2018

VALUE:

£1.25m

Dodd Group is responsible for the provision of an electrical testing regime and the maintenance and repair of electrical appliances, emergency lighting and electrical installations within domestic and public buildings across Leamington Spa, Warwick, Kenilworth and Whitnash, including:

- 5,000 domestic houses and high rise flats
- Sheltered Schemes
- Temporary Homelessness Hostels
- Leisure Centres

Energy Efficiency

We are currently completing 2 rewire projects on this contract incorporating the replacement of existing storage heating with Dimplex Quantum heaters. We are using predominantly QM070 heaters in place of 2.4kw storage heaters and QM150 heaters in place of 3.4kw storage heaters; providing more heat output according to site specific calculations. Heat distribution is now more efficient and the increased levels of insulation ensure they are not extremely hot to the touch as the old models were.
