

Beam, a recently launched drop-in facility in Shrewsbury & Telford for the Children's Society, aims to provide young people aged 0 - 25, parent(s)/ carers of young people & professionals with advice, signposting and support with any concerns relating to mental and emotional wellbeing. It's team is very passionate about empowering young people and believe that simply listening to a young person's experience or using therapeutic strategies and providing information can make all the difference.

Beam is in the process of refitting a permanent venue for this service in Wellington, Telford, which will allow it to expand on the work that it is already doing as well as hopefully making it more accessible for more service users.

Dodd Group was delighted to help out with the fitting out of the new premises with the donation of essential kitchen equipment as well as a television. Claire Bristow from the procurement team was on hand to help deliver the new equipment.
